# ...MR Neuroimaging study day

Hull University Teaching Hospitals NHS Trust

Come and join us for a day of MR Neuroimaging. At this CPD NOW endorsed event we will not only cover the basis of MR Neuroimaging techniques but we will aim to provide you with the necessary knowledge to implement these techniques at your own site. The goal of this study day is to focus on the needs of MR radiographers so that they will feel confident when using more advanced MR Neuroimaging techniques such as perfusion, DWI/DTI, SWI, and spectroscopy. Additionally, we will explore recent technological advances to allow imaging of challenging cohorts such as claustrophobic, moving, or paediatric patients. We will also discuss imaging of common neuro based active implants. All this for only £50 and you even get fed and watered!

## Topics covered

ASL

SWI

Perfusion

DWI and DTI

Spectroscopy

Active implants

New tools for old challenges

ERMEC  
Hull Royal  
Infirmary, Alderson  
House, Anlaby Rd,  
Hull HU3 2JZ
